

SHORT RISE VERTICAL PLATFORM LIFTS

The OPAL Model is an extremely popular and reliable accessibility solution for public buildings and private residences. This durable and easy-to-use lift is suitable for indoor or outdoor applications.

Standard Features

- Suitable for indoor and outdoor installations
- Can be installed directly onto the floor or into a shallow pit if desired
- Can accommodate changes in level of up to 2 metres (floor to floor travel)
- Interlocked safety gate at upper landing and on lift platform (self closing)
- Easy to use directional control switches
- Audible illuminated emergency stop / alarm switch (on lift platform)
- Grabrail (on lift platform)

Standard Options Available Include

- Through access (straight through) or side access (adjacent entry / exit) platform
- 3 platform sizes available
- Powered gate operators
- Non standard colours (available upon request)
- Keyswitch on platform and call stations (to prevent unauthorised use)
- Auto-fold or fixed ramp (at lower level when pit is not available)
